ABOUT ME

I am a highly motivated and passionate Computer Programming student with a strong academic record, maintaining a 4.0 GPA. Skilled in web development and object-oriented programming, I am eager to apply my knowledge and contribute to your company's success as an intern.

EXPERIENCE

WORK EXPERIENCE – OSELLA TECHNOLOGIES JULY 2023 – JULY 2024

Apprenticed as a millwright for a year at a robotics company responsible for the production of automated machines used in manufacturing.

EDUCATION

ST. ANNES HIGH SCHOOL SEPTEMBER 2019 – JUNE 2023

Attended for all 4 years of my High School Pursuit

ST. CLAIR COLLEGE SEPTEMBER 2024 - PRESENT

Currently Studying Computer Programming

SKILLS

- Web Development
- GitHub
- Java
- OOP
- Problem solving
- Flexibility
- Communication
- Organization
- Critical thinking
- Collaboration

ACTIVITIES

Besides programming, I also enjoy diving into other activities as well. I am a self-taught music producer with 2 years of experience, I also enjoy studying theology and am quite involved in church activities.

I am also currently working on my own side programming project aimed at making reading the word of God a better experience. While far from completion at the moment, this app will allow user to read the bible on the go, make daily reading disciplines, and equip Christians with the tools and resources necessary to help better understand what they are reading/studying.
